

电工电子学实验课程介绍

一、中文简介：

《电工电子学实验》是为高等学校非电类专业设置的一门技术基础实验课程，是理论课程"电工电子学"的配套课程。课程内容主要包括电路、电子技术、变压器、电动机及其控制、可编程序控制器等相关的一些实验。

二、英文简介：

"Electrical and Electronics Experiment" is a basic technical experiment course for non-electrical speciality of colleges and universities. It is the matching course of theoretical course "Electrical Engineering and Electronics". The course content includes circuits, electronics, transformers, motors and their control, programmable logic controllers and other related experiments.
